EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE SPECIFICATION:

Page 6, line 26, replace "441" with ---441a---.

Page 7, line 2, replace "441" with ---441a---.

Page 7, line 18, replace "421" with ---421a---.

IN THE CLAIMS:

Claim 1, line 14, delete "and".

Claim 3, line 3, replace "a", both occurrences, with ---the--- in order to be clear that it is referring to the preliminarily discharging cap member and the preliminarily discharging member of claim 1.

Claim 5, line 8, replace "the" in "the protective member" with ---a--- in order to overcome a lack of antecedent basis.

Note that the Applicant was not contacted for the above amendments to the specification and claims since they are clearly a typographical error.

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

The primary reason for the indication of the allowability of claims 1-8 is the inclusion therein of the combination of an electrostatic induction member including an isolation polymer insulator provided at the upper portion of the fixing bar, an auxiliary discharging member, which has at least one thin plate to be stacked through a center of which a lower end part of the isolation polymer insulator passes, a preliminary discharging cap member made of conductive material and positioned at a lower surface of the auxiliary discharging member, and a preliminarily discharging member fixed to the fixing bar in such a manner that the preliminarily discharging member maintains a non-contact state with respect to a lower surface of the auxiliary discharging member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chung (Pub. No. US 2004/0105211 A1) discloses discharge-dissipation lightning air terminals with a potential modifying unit attached releasably on the discharge member. Fowler et al. (US 6,690,562 B2) disclose a lightning

dissipater.

suppression system using cables. Rapp (US 6,649,825 B2) discloses a human impalement prevention system. Brammer (US 6,498,291 B2) discloses a static electricity eliminator. Gumley (US 6,320,119 B1) discloses air terminals of two types having curved surface electrodes. Zini et al. (US 6,307,149 B1) disclose a lightning protection system. Smith (US 6,167,896 B1) discloses lightning shelters. Carpenter (US 5,073,678; 4,180,698) discloses a spline ball terminal and a system and equipment for atmospherics conditioning. Sadler et al. (US 4,910,636) disclose a static electricity

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adolfo Nino whose telephone number is (571) 272-1981. The examiner can normally be reached on M-F (7:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean A Reichard can be reached on (571) 272-2800 ext. 31. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
